

## USIL WayLube Series

USIL WAYLUBE SERIES are designed for way lubrication.

### Qualities:

**USIL WAYLUBE SERIES** formulated with virgin high VI base-stocks combined with a special friction modifier that yields extremely low values in Cincinnati Milacron's stick slip test.

**USIL WAYLUBE SERIES** contain an additive package that eliminates the possibility of contamination through emulsification between the coolant and way lube.

**USIL WAYLUBE SERIES** also contain a tackiness additive, which helps the oil stick to the slides and ways improving lubrication, increasing film strength and eliminating stick-slip and chatter.

These products will provide the ultimate in performance in slide-way lubrication.
